How much will a booth cost?

Calculate the total booth square feet by the appropriate cost in the chart on the right. A 10' x 10' commercial in-line booth is 100 square feet. $40 \times 100 = \$4,000$ for the booth.

Nonprofit booths will cost a flat fee of \$26 per square foot regardless of a corner or in-line. We will assign what's available to you. If you have a preference, please let us know in the booth application.

Booth Type	Cost per Square Foot
Commercial In-Line	\$41
Commercial Island	\$42
Commercial Corner	\$500
Nonprofit	\$27

You have the option to now enhance your booth by upgrading to a commercial corner for an additional \$500.

Example: You can purchase a commercial in-line booth and enhance your booth to a corner.

$\$40 \times 100 + \$500 = \$4,500$
